

Instant Underflow Dam

Prevent spills from spreading with the quickest way to dam up ditches and small streams.

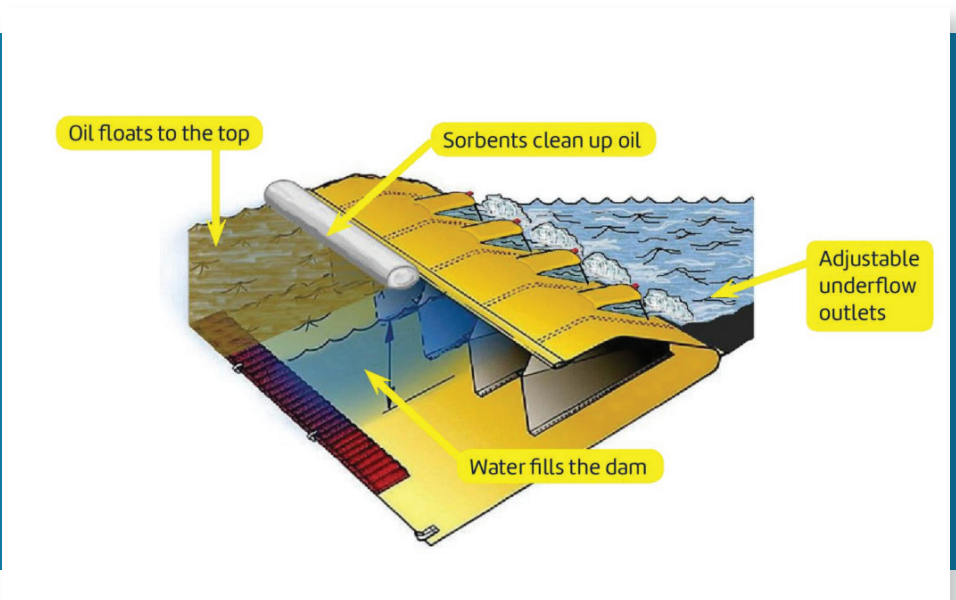

THE INSTANT UNDERFLOW DAM ADVANTAGE

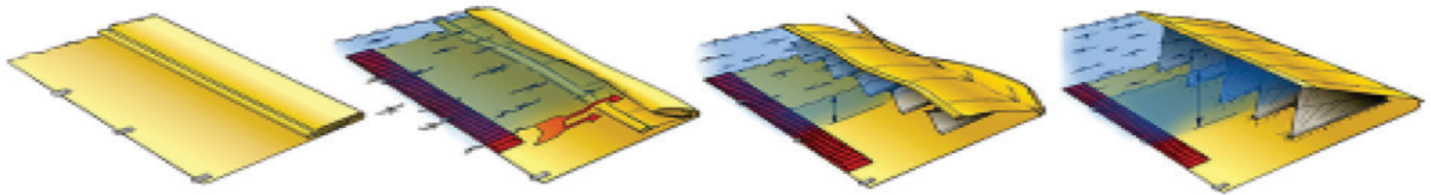

Installs in minutes with only 2 or 3 people.

- ✓ Flexible material allows it to adapt to most stream and ditch bottoms.
- ✓ No special equipment. No filling with water or inflating with air. No anchoring.
- ✓ Simply unroll the dam, unfold the upstream flap and let the flow of the stream fill it.
- ✓ Underflow holes are built into the downstream side.
- ✓ Multiple units can be attached to make whatever length you need.
- ✓ Wash and reuse dozens of times.

Designed for Emergency Operations in Water Currents or Ditches

Available in sizes:

DAM2125: 21”H x 25’L

DAM2825: 28”H x 25’L

DAM3930: 39”H x 30’L

SKU	DAM2125	DAM2825	DAM3930
Water Retention Height	21”	28”	39”
Product Length	25 feet	25 feet	30 feet
Product Width (Stream Bottom Skirt)	72”	97.5”	158”
Product Weight	37.4 lbs	59.5 lbs	150 lbs
Rolled Up Dimensions	16”W x 16”L x 20”H	16.5”W x 16.5”L x 25”H	21”W x 15”L x 37”H
Underflow Holes	13	14	19
Carrying Case	YES	YES	YES
