

SPILLS ON LAND

Simplify Spill Control

Control spills in wet weather. Reduce cleanup costs.
Save hours of time. Eliminate NOVs.

Spilltration® materials are
manufactured exclusively by
HalenHardy®

Announcing HalenHardy Spilltration® Husky materials.
Our fibers are made from 100% post-consumer waste to
help support your company's sustainability initiatives.

OIL SPILLS ON LAND

Shouldn't your
absorbents work
with you instead
of against you?

OUT OF CONTROL

You wouldn't be caught dead in a Zoot or Leisure Suit. So why the heck would you be caught flat-footed with old-fashioned spill materials?

White spill pads came into popularity at the height of the leisure suit craze in the late 1970s. They work well in dry weather but are only about 30% effective in wet weather. It's bad enough that you have to respond to spills in the rain.

Clay chips first came on the scene in about 1941 when zoot suits were all the rage. The clay was an improvement over sawdust. But it is heavy, bulky, dusty, and doesn't work in wet weather.

THE WRONG WAY TO CONTROL OIL SPILLS

Clay + Oil + Rain = A muddy mess.

White spill pads blow away in the wind.

Clay contains dangerous silica dust.

Outdated white socks and pads let oil escape down the drain in wet weather.

UNDER CONTROL

FRONTLINE WORKERS

Linemen, Mechanics,
Maintenance Technicians

90% of dielectric (and hydraulic) fluid spills are discovered by frontline workers, NOT by spill cleanup contractors. In fact, the cleanup crews might not arrive on the scene for an hour or more after the spill. The problem is, 70% of all spills happen in wet weather, and the slick spreads like wildfire...UNLESS you have the right tools.

- ✓ Sorbent products that work in wet weather or dry
- ✓ Compact, so they fit in tight nooks and crannies of your crowded vehicles and equipment
- ✓ Common-sense shapes and sizes that keep the spill in check until the cleanup crews arrive

There are two main weapons for frontline crews:

- 1) **Spilltration® Oil Filter Husky Rugs** will protect storm drains or blanket the spill.
- 2) **Spilltration® Husky Oil Filter Strips** hug the ground and steer spills away from sensitive areas.

ENVIRONMENTAL PROS

SPILL CONTRACTORS

Once the spill pros arrive, they will bring additional tools to get down to business. They have lots of space on their spill trucks and trailers. So, in addition to carrying bulk "pro packs" of Husky Rugs and Strips, they will carry the following Spilltration® products in their arsenal:

- ✓ **DamSock™ Oil Filter Dikes** to further protect drains and sensitive areas.
- ✓ **Spilltration® Husky Oil Filter Pads** to sop up spills.
- ✓ **Spilltration® Oil Shammy Towels** for final cleanup and decon.

The Five S's of OIL SPILL RESPONSE

1 SHROUD

Protect Drains
Shield Outflows
Guard Vegetation

STEER 2

Channel
Direct
Funnel

3 STOP

Stop Spread
Minimize Pollution
Facilitate Clean Up

SOP 4

Soak Up
Sponge
Sorb

5 SHINE

Decon
Wipe Down
Grab Fine Sheen

FRONTLINE WORKERS

Frontline Workers' Guide to Controlling Oil Spills on Land

Did you ever notice that transformers (or hydraulic hoses) rarely seem to pick a nice, clear, sunny day to leak or explode? It's not your imagination. The simple truth is that more than 70% of outdoor spills happen in wet weather (unless you live in the desert). And when ground surfaces are wet, runoff water transports oil toward storm drains 100x faster than in dry conditions. And, once an oil spill gets to a waterway, your problems expand exponentially. So, the #1 priority is to prevent the spill from entering a waterway through storm drains. That's why we invented a tool to help frontline workers protect storm drains. It's called Spilltration® Husky Rug.

SMOOSHED HUSKY RUG: Husky Rugs are big enough to cover most storm drains. Best of all, they are "Smooosh" packed into vacuum-sealed bags that take up take up 75% less space than outdated spill kits.

32" x 48" Husky Rugs are perfect for protecting storm drains.

SMOOSHED HUSKY STRIPS: Early on, we were amazed at how well the Husky Rug adhered to the ground. So we wondered, "Could we slit the rugs into strips to 'steer' the spills?" We soon found that an 8-inch wide strip did the trick. And they worked 10x better than the old-fashioned socks. As you learned on page 3, frontline workers need two main tools to prevent the dielectric fluid (or hydraulic fluid or diesel) from spreading. And, Husky Strips are part of that one-two punch.

Like Husky Rugs, our Husky Strips can be Smooshed to fit into the smallest nooks and crannies of your vehicles.

8-inch wide Husky Strips lay flat. Simply surround the spill and hold back the oil until cleanup pros arrive.

FRONTLINE BONUS

Smooshed Husky Pads for sopping up small spills.

Great for blown hydraulic lines and diesel slobber (and of course, transformer oil).

SPL007

Smooshed Husky Rugs

dimensions	32" W x 48" L
sold as	5 per case
case contents	5 individually smooshed rugs
absorbency	16 gal/case 3.2 gal/each
msrp	\$116 per case

SPL008

Smooshed Husky Strips

dimensions	8" W x 64" L
sold as	20 per case
case contents	5 packs of 4 strips
absorbency	21.5 gal/case 137.5 fl oz/each
msrp	\$126 per case

SPL002

Smooshed Husky Pads

dimensions	16" W x 16" L
sold as	50 per case
case contents	10 packs of 5 pads
absorbency	27 gal/case 68.9 fl oz/each
msrp	\$164 per case

ENVIRONMENTAL PROS

Bring out the big guns when the spill cleanup crews arrive.

Most spill contractors have a fleet of pickup trucks, box trucks, and trailers. They are not as concerned about space for storing Spilltration® products as frontline workers. So, smooshing doesn't matter as much.

Contractors need lots of Spilltration® power in sizes that can be deployed quickly and cover large areas. **That's why we make our "Pro Series" of Spilltration® products.**

Like frontline workers, spill pros carry Husky Rugs and Strips - packed in bulk for rapid deployment.

SPL030

Pro-Packed Husky Rugs protect drains and outfalls.

dimensions	32" W x 48" L
sold as	9 per case
case contents	9 individually rolled rugs
absorbency	29.1 gal/case 3.2 gal/each
msrp	\$137 per case

SPL031

Pro-Packed Husky Strips surround spills quickly.

dimensions	8" W x 64" L
sold as	36 strips per case
case contents	36 individually rolled strips
absorbency	38.8 gallons/case 1.1 gal/each
msrp	\$187 per case

SPL029

Pro-Packed Husky Pads pack 32 gallons of super sorber power into two 9-pound contractor bags.

dimensions	16" W x 16" L
sold as	60 per case
case contents	2 bales of 30 pads
absorbency	32.3 gal/case 68.9 fl oz/each
msrp	\$142 per case

2 SIZES

Husky DamSock™ stops stubborn spills and stays put. Lets clean water filter through.

mfn	SPL092	SPL120
dimensions	3" W x 42" L	3" W x 8' L
sold as	3 socks/case	2 socks/case
absorbency	1.78 gal/case 75.8 fl oz/sock	3 gal./case 1.5 gal./sock
msrp	\$67 per case	\$569

Blanket large areas quickly with Spilltration® Rolls

Specs	Mini Roll	Master Roll
mfn	SPL023	SPL018
dimensions	32" W x 25' L	64" W x 100' L
sold as	each	each
absorbency	20.2 gal/roll	161 gal/roll
msrp	\$88 per roll	\$672

Old-fashioned, stiff white spill pads fall to pieces when you try to clean up oil on rough pavement.

Durable Oil Shammy towels don't fall apart when scrubbing up the final oily sheen on the pavement. They are so tough you can wring them out and use them over and over.

IT'S TIME FOR AN UPGRADE

Like the old white oil spill sheets, members of the HalenHardy® team have been in the industrial cleanup business since the '70s. But, unlike the folks that manufacture the white stuff, our gang is not married to outdated manufacturing methods. I guess our rivals have millions of dollars tied up in melt-blown polypropylene equipment, so they are stuck with "selling what they make."

On the other hand, we are never satisfied with the status quo. So when we invented the Oil Shammy Towel, we started with the result we wanted our clients to get...a durable, supple, reusable final oil wipe-down towel. Then we worked our way backward to find the staple fibers and equipment to match our goal.

The outdated white spill pad is stiff as a board, making wiping oily surfaces 10x harder than necessary.

Innovative Oil Shammy towel is soft and supple, making oily cleanup and wiping 10x easier.

Why are Oil Shammy Towels both soft and durable?

Our barbed-needle entanglement process assures the Shammy towels are strong and supple. They are so durable you can wring them out and use them over and over and over. You can't do that with flat, stiff outdated oil spill pads.

RIDDLE: What became popular at the same time as fax machines, is stiff as a board, and falls apart when trying to wipe up an oil spill on the pavement?

ANSWER: White Meltblown Polypropylene spill pads.

We've certainly updated our sense of style since 1979. Maybe it's time to upgrade your spill cleanup products.

MODERN MARVEL: OIL SHAMMY TOWELS

**SHEEN
PLUCKER**

**SLICK
SWEEPER**

**PAVEMENT
POLISHER**

SPL009

10 X 16 Smooshed Oil Shammy Towel

dimensions	10" W x 16" L
sold as	500 per case
case contents	10 packs of 50 towels
absorbency	42.3 gal/case 10.8 fl oz/each
msrp	\$290

SPL003

16 X 16 Smooshed Oil Shammy Towel

dimensions	16" W x 16" L
sold as	500 per case
case contents	10 packs of 50 towels
absorbency	67.7 gal/case 17.3 fl oz/each
msrp	\$427

SPL032

16 X 16 Pro-Packed Oil Shammy Towel

dimensions	16" W x 16" L
sold as	500 per case
case contents	10 packs of 50 towels
absorbency	67.7 gal /case 17.3 fl oz/each
msrp	\$373

SPL056

Oil Shammy Towel in Dispenser Box

dimensions	10" W x 16" L
sold as	100 per case
absorbency	10.8 fl oz/each 8.5 gal/box
msrp	\$63

Oil Shammy Roll

When you gotta sweep the final sheen on top of the water. It works like magic.

dimensions	16" W x 1,200' L
diameter	28"
sold as	each
msrp	\$649 per roll

SPL044

Soft and supple Oil Shammy fabric creates the patented SpillBoa® boom.

Cross Sections:

Outdated & overstuffed 5" spill boom (left)
Flexible 5" SpillBoa® flat boom (right)

Old-fashioned oil spill booms are stuffed with white "pulp." Unfortunately, they are packed so tight it restricts absorption by up to 70%.

With SpillBoa®, we reinvented the boom category by gathering and puckering long strips of soft Oil Shammy fabric inside pliable boom netting. Thanks to all the open spaces, the oil spill gets absorbed quickly into a flexible core. Visit www.halenhardy.com/spillboa for more info.

CASE BRIEF

A large transformer blew up at the headwaters of a small feeder stream to a drinking water dam. After the main cleanup was done, a fine sheen persisted. The contractor used **rolls of Oil Shammy** to act as "sheen sweeps" to get rid of the last detectable rainbow.
