

HOW LONG WILL A HUSKY POLYBACK OIL FILTER PAN LAST?

Spilltration® Husky Polyback Oil Drip Filter Pan

	MAY	JUN	JUL	AUG	SEPT	AUG
• 1 Drop	[Green arrow spanning from May to August]					
• 2 Drops	[Light green arrow spanning from May to July]					
• 3 Drops	[Blue arrow spanning from May to June]					

● 1 DROP = 12 WEEKS ● 2 DROPS = 6 WEEKS ● 3 DROPS = 4 WEEKS

Calculate how long your Husky Filter Pan will Last

1. Grab a stopwatch or use your phone
2. Select the oil leak you want to measure
3. Count the number of drops per minute

Based on the number of drops per minute, use the table above to gauge how long until filter pad change out.

WARNING: The speed of drips will vary with seasonal temperatures. The best practice is to check once every 90 days.

CALCULATE YOUR DRIP

- 1 drop per minute = 12 weeks 
- 2 drops per minute = 6 weeks 
- 3 drops per minute = 4 weeks 

Part #SPL086: Regular (17" x 17")

Great for placing directly under persistent drips and leaks. Three 16" x 16" Husky pads on the inside of the pan, absorb up to 1.5 gallons.

Simplify cleaning up persistent oil leaks and drips in the outdoors.

- ✓ Engineered for the rainiest conditions
- ✓ Reduces cleanup costs by up to 90%
- ✓ Saves hours of change out time
- ✓ Set it. Forget it.™
