

Spilltration® Husky Polyback

Do you have equipment, machinery, or piping outdoors? Does it sometimes leak oil?

If you've struggled with persistent outdoor oil leaks and drips, you're about to discover a new and better way to control, contain, and clean them up.

THE CHALLENGE: CONTROLLING OUTDOOR OIL LEAKS & DRIPS

Did you know that 80% of all hydrocarbon spills on land happen due to vehicle or equipment failures?

Oil and fuel from these leaks collect on asphalt and gravel. Then when it rains, it spreads across the lot and into storm drains.

Traditional white spill pads were never meant for long-term outdoor use, and drip pans fill with water, allowing collected oil to rise right over the rim. When these stop-gap methods fail, you're left digging out oil-soaked shale or hiring expensive remediation contractors.

When it rains, water lifts the oil off the white sheets, and the rain carries it away.

In sunlight, white sheets turn to dust in just a few weeks.

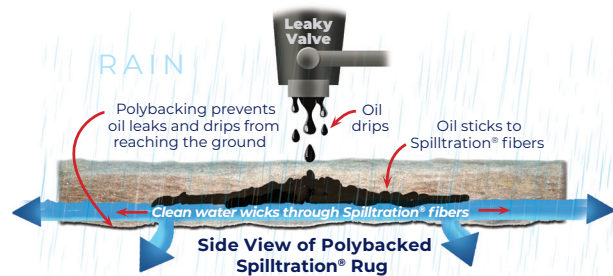

In dry weather, oil bleeds through white sheets, contaminating the ground.

In windy weather, white sheets blow away.

THE SOLUTION: SPILLTRATION® HUSKY POLYBACK

The Spilltration® Husky Polyback family of products are engineered with an **innovative filtration and absorption technology** that captures oil while filtering out clean rainwater. No rain carrying oil off into the surrounding area. No degraded polypropylene spill pads. No overflowing drip pans.

Spilltration® Husky Polyback Products have two sides. A thick, absorbent Spilltration® fiber top side captures oil and allows clean water to filter through; and a leak-proof polymer backing prevents oil leaks from reaching the ground.

- **UV Resistant:** Will not degrade in sunlight. Great for long term outdoor deployment.
- **Eco-Friendly:** Made from post-consumer waste. Reduces waste by 70%.
- **Cost Effective:** Cuts costs by 50% or more.

SPL016

Spilltration® Husky Polyback Master Roll

Master Rolls are for the big jobs, whether used as an oil filter blanket when decontaminating oil-covered superstructures, after a large equipment failure or placed under a large area of persistent oil leaks. Impermeable backing. Sold as each.

dimensions	64"W x 100'L
absorbency	161 gal/roll
weight	112 lbs/roll

SPL019

Spilltration® Husky Polyback Oil Filter Mini Roll

Mini Rolls are perfect for cutting to size to precisely fit specific applications. Big enough to cover large areas. Small enough to be managed by one person. Impermeable backing. Sold as each.

dimensions	32"W x 25'L
absorbency	18.3 gal/roll
weight	14 lbs/roll

SPL027

Spilltration® Husky Polyback Rug

Husky Polyback Rugs are precut to 32" x 48" and great for putting under small to medium-sized leaks and drips. Impermeable backing. Sold as nine rugs per case.

dimensions	32"W x 48"L
absorbency	2.9 gal/rug 26.1 gal/case
sold as	9 rugs/case

SPL050

Spilltration® Husky Polyback Pad

Husky Polyback Pads are great for putting under small leaks and drips. Impermeable backing. Sold as 50 pads per case.

dimensions	16"W x 16"L
absorbency	62.4 fl oz/pad 26.3 gal/case
sold as	50 pads/case

Compliance and Regulations:

- Does not float. Not for use on water.
- DO NOT use with acids, bases or other caustic liquids.
- Dispose of used product in compliance with local, state and federal regulations.
